

Table 5.H

Temporal-expressions in the plates of the *Book of Mormon* (36 categories)

Temporal-expressions in this Table are categorized in the following ways:

First, by the three sets of plates that contain the narratives of the extant text of the *Book of Mormon*: the small plates of Nephi, the plates of Mormon and the plates of Moroni.

Second, by the five types of narrative-links: Q = preposition; R = verb; S = conjunction; T = participle; U = adverb.

Third, by the three types of components that structure year-related expressions: year-, time- and number-terms.

Fourth, by the nine types of these components identified as distinct categories, at least within the plates of Mormon:

Year-terms: A = express singular; B = express plural; C = implied singular.

Time-terms: D = official; F = altered; G = personalized.

Number-terms: K = stated ordinal; L = stated cardinal; M = common.

Fifth, by total numbers of temporal-expressions in all the plates (sorted from largest to smallest). The numbers and percentages for each temporal-expression category are listed.

Lastly, by the category number assigned to each temporal-expression category; e.g., the QAK category is assigned number 1, the QADK category is assigned number 2, the RAK category is assigned number 3, and so forth.
